Professional Summary

Developer in Test with over 2 years of experience in manual and automated testing. Proven track record of improving test coverage by 80%, reducing production bugs by 30%, and integrating scalable test solutions using Cypress, Selenium, and Docker. Strong collaboration and debugging skills, passionate about building reliable and user-focused applications.

Education & Certifications

Brellion College, Harare, Zimbabwe
Business Sciences (2018 – 2022)

Certifications

- Cyber Security Fundamentals (2024)
- Python for Data Science
- Cloud Fundamentals
- Azure DevOps Badges
- CI/CD Pipelines (Azure)

Core Skills

Testing Expertise

- Manual Testing
- Automation (UI & API)
- E2E Testing
- Regression Testing

Tools & Frameworks

- Selenium
- Cypress
- Appium
- Postman
- Docker
- Jenkins
- GitHub Actions

Programming Languages

- Python
- Java
- TypeScript
- SQL

Frontend

- HTML
- CSS
- React.js
- Next.js

Databases

- MySQL
- PostgreSQL

DevOps

- CI/CD Pipelines
- Docker
- GitHub Actions

Professional Experience

QA Automation Engineer
Arity Solutions, South Africa

Jan 2024 – Present

- I develop and maintain automated tests (Selenium, TestNG, Postman), perform web and API testing, and collaborate in agile teams
- I manage bugs with Jira, integrate tests into CI/CD pipelines, and help improve QA practices for efficient, high-quality software delivery

Software QA Tester (Open Source)
Mentored by Nkossikk

Aug 2024 – Jan 2025

- Performed API testing with **Postman** and **RestAssured**
- Built CI pipelines to streamline deployments
- Ran performance tests for scalability
- Created test plans and scripts for enterprise web apps

Developer in Test (Collaborator)
Mentored by Vusi Pela

Jul 2024 – Oct 2024

- Built automated test suites for web/mobile apps, reducing manual testing by 40%
- Used **JMeter** for performance testing under high traffic
- Integrated tests into **Jenkins CI/CD**, minimizing deployment errors
- Performed exploratory testing to uncover edge cases and improve robustness

Project Intern

Tach Luxure, City of Johannesburg, Gauteng, South Africa

Jul 2023 – Dec 2023

- Sales Support: Assisted in promoting and managing sales of IT hardware, computers, and software solutions tailored to client needs
- Website Development: Played an active role in developing and maintaining the company's websites, focusing on both functionality and visual design to improve public presence
- Brand Presence: Helped enhance the company's digital identity and online visibility through web updates and interface improvements
- Customer Engagement: Supported client inquiries and product presentations, ensuring technical solutions were well-communicated and aligned with customer expectations
- Built <https://www.tachluxure.co.za/>

Key Projects

Swag Labs Testing

- Contributed to an open-source QA collaboration with 40+ testers
- Automated key user journeys using Cypress and Selenium
- Reduced manual test time by 60%

Data-Driven Testing Framework

- Built a scalable test framework using Docker and PostgreSQL
- Enabled parallel execution and API response validations

E-Commerce Store

- Designed a full-featured React-based store with integrated tests
- Achieved 90%+ component coverage using Cypress & Jest

E-Learning Platform

- Developed full-stack learning platform (React + Express + MySQL)
- Implemented authentication and tested key flows with Postman

Testing Playground Web Application (In Progress)

- Developing an all-in-one platform that simulates real-world testing scenarios
- Inspired by Parabank, RedRes, Dog API, Sauce Demo, The-Internet, DemoQA, and others
- Integrates REST API testing, dynamic UI components, and advanced QA challenges in one app
