Ⅲ Professional Summary

Developer in Test with over 2 years of experience in manual and automated testing. Proven track record of improving test coverage by 80%, reducing production bugs by 30%, and integrating scalable test solutions using Cypress, Selenium, and Docker. Strong collaboration and debugging skills, passionate about building reliable and user-focused applications.

Education & Certifications

• Brellion College, Harare, Zimbabwe

0'Level Certificate (2018 - 2022)

Contact Information

3-, ------

Certifications

- Cyber Security Fundamentals (2024)
- Python for Data Science
- Cloud Fundamentals
- Azure DevOps Badges
- CI/CD Pipelines (Azure)

Core Skills

- Testing Expertise: Manual Testing, Automation (UI & API), E2E Testing, Regression Testing
- Tools & Frameworks: Selenium, Cypress, Appium, Postman, Docker, Jenkins, GitHub Actions
- Programming Languages: Python, Java, TypeScript, SQL
- Frontend: HTML, CSS, React.js, Next.js
- Databases: MySQL, PostgreSQL
- DevOps: CI/CD Pipelines, Docker, GitHub Actions

Professional Experience

Developer in Test

Mavusana Training, South Africa | Jul 2024 - Present

- Automated testing workflows using Selenium and Cypress
- Collaborated with developers to debug and resolve defects in staging environments
- Wrote reusable test scripts integrated into CI/CD pipelines

Automation Tester Intern Nkossikk | Jul 2024 - Aug 2024

- Supported QA lead in executing manual and automated test plans
- Conducted exploratory testing for mobile and web apps
- Participated in agile stand-ups and sprint reviews

Manual Tester

Classic Inv, Zimbabwe | 2023 - Jan 2024

- Performed UI and usability testing across desktop/mobile
- Created detailed bug reports and collaborated with dev teams
- Maintained regression and sanity test cases in test repository

Key Projects

Swag Labs Testing

- Contributed to an open-source QA collaboration with 40+ testers
- Automated key user journeys using Cypress and Selenium
- Reduced manual test time by 60%

Data-Driven Testing Framework

- Built a scalable test framework using Docker and PostgreSQL
- Enabled parallel execution and API response validations

E-Commerce Store

- Designed a full-featured React-based store with integrated tests
- Achieved 90%+ component coverage using Cypress & Jest

E-Learning Platform

- Developed full-stack learning platform (React + Express + MySQL)
- Implemented authentication and tested key flows with Postman

Testing Playground Web Application (In Progress)

- Developing an all-in-one platform that simulates real-world testing scenarios
- Inspired by Parabank, ReqRes, Dog API, Sauce Demo, The-Internet, DemoQA, and others
- Integrates REST API testing, dynamic UI components, and advanced QA challenges in one app
